This helps children to work better in operational groups by comparing groups, creating equivalent groups and more. This page prints worksheets by simplifying the correct fraction, invalid fraction, mixed numbers, and more. Some of them can be accessed for free. You are here: Home → Worksheets → 2 Fractions This worksheet generator consists of worksheets for four different fraction themes: (1) equivalent fractions, (2) fraction simplification, (3) convert fractions to mixed numbers, and (4) convert mixed numbers to fractions. You can control ranges, font size, number of problems, and more for the entire number of parts, counter, and denominator ranges. You can force not to simplify the answers, which is useful for class 4, when students learn to write mixed numbers as fractions and vice versa, but did not yet know about simplification. Basic worksheet instructions Each worksheet is randomly generated and therefore unique. The reply key is generated automatically and saved to the second page of the file. You can generate worksheets in html or PDF format, both of which are easy to print. To get a PDF worksheet, just click the button named Create PDF or Make PDF Worksheet. To get the worksheet in HTML format, click the View in Browser or Make html worksheet button. This is useful if you can save the worksheet directly from your browser (select File → Save) and edit it in Word or another word-processing program.
